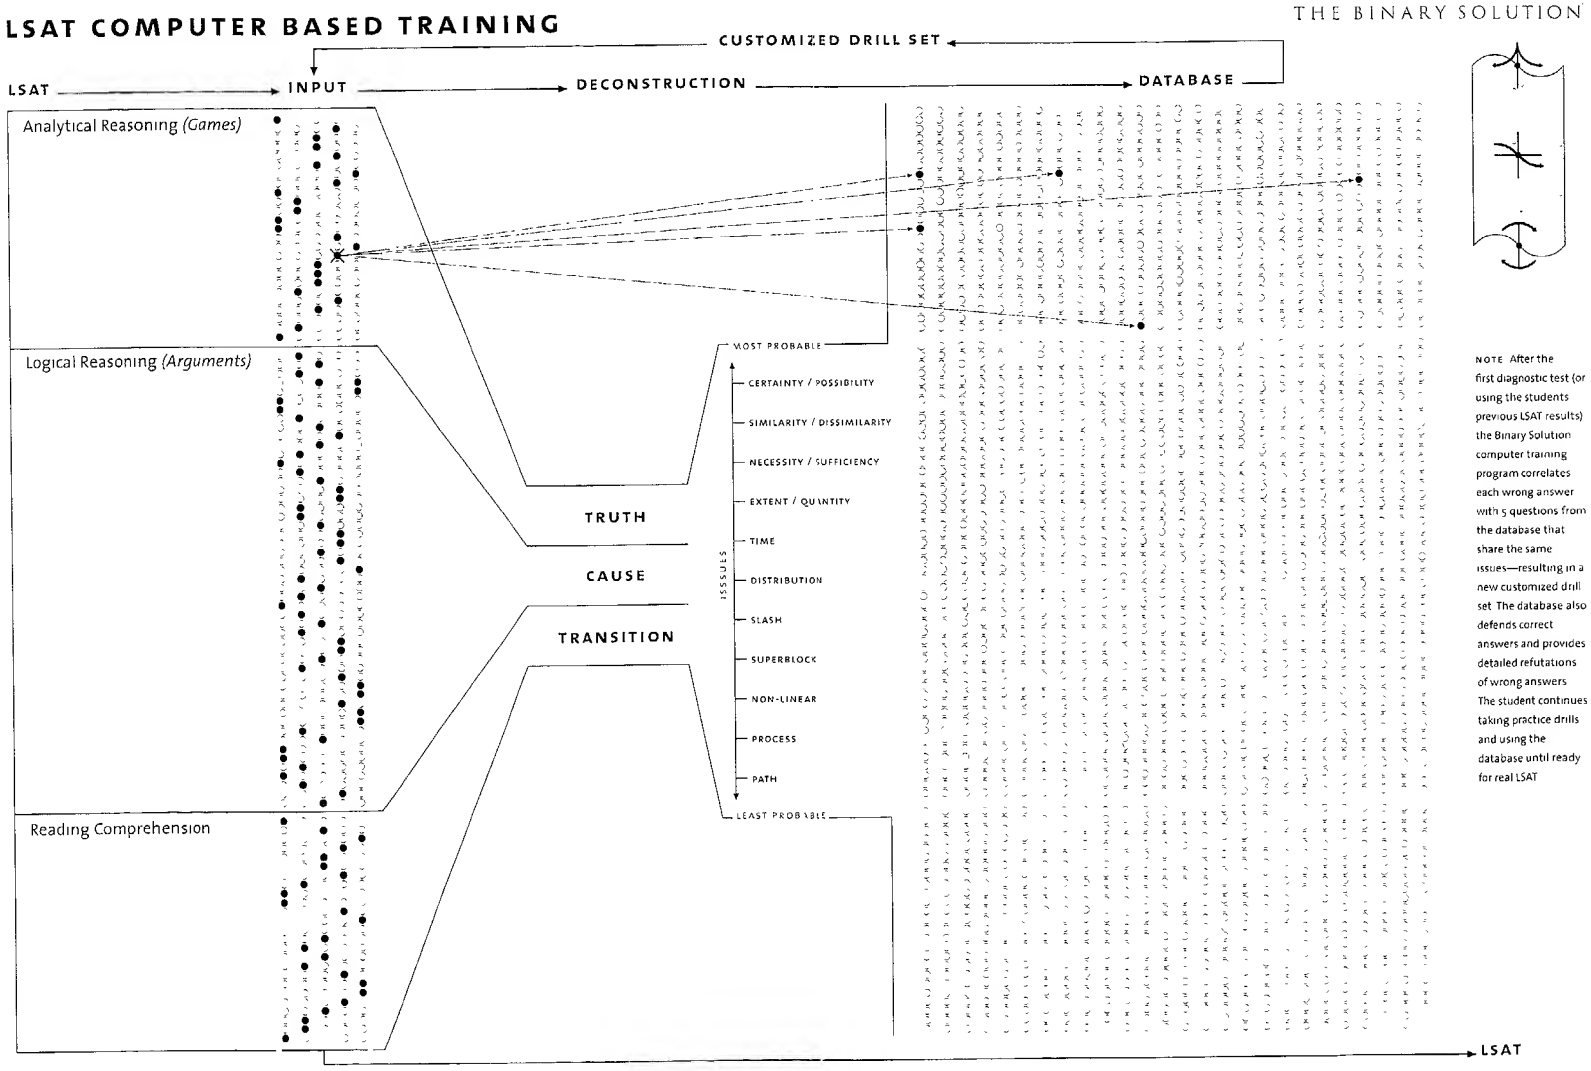
LSAT COMPUTER BASED TRAINING

THE BINARY SOLUTION



NOTE After the first diagnostic test (or using the students previous LSAT results) the Binary Solution computer training program correlates each wrong answer with 5 questions from the database that share the same issues—resulting in a new customized drill set The database also defends correct answers and provides detailed refutations of wrong answers The student continues taking practice drills and using the database until ready for real LSAT

T08050"9E9T5860

The unique intellectual architecture of our Database is founded upon our method of Deconstruction

1. Subject matter is reduced to a finite set of issues

2. Each practice question contains a finite subset of those issues

3. Matches can be made with other questions that contain some or all of the same issues

The DATABASE GENIES ™

For **each** question the user answers **incorrectly**:

Explanation Genie
explains why the user's response is incorrect & why the credited response is correct

Drill Genie
searches for 5 similar questions so that the user can learn from his mistakes
